

High Resolution and Accurate Colors for Documentation

High Image Quality and Reliable Color Reproduction with
5.05-Megapixel High-Resolution CCD.
Streamline Documentation Procedures with High Frame-Rate Live Capture.

High Quality Image Design Optimized for Documentation

◎ 5.05-Megapixel High-Definition CCD

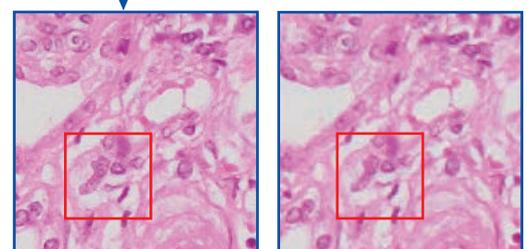

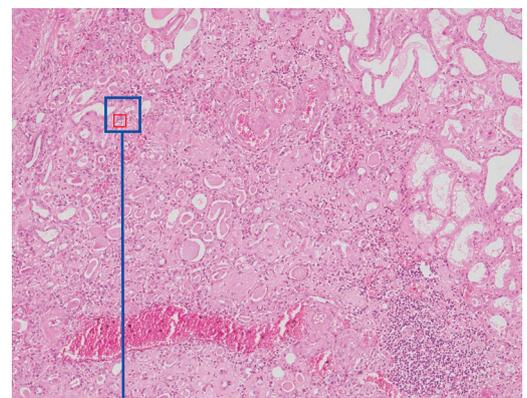

Equipped with an exceptional 5.05-megapixel CCD, the DP27 digital camera captures images at up to 2448 x 1920 pixel resolution. Large areas captured at low magnification offer exceptionally vivid clarity, even when enlarged several times.

◎ Excellent Color Reproduction

Precise reproduction of fine structures and subtle color differences allows areas of interests on the monitor to be identified with an accuracy equivalent to observation through microscope.

◎ 15 Frames Per Second Under High Resolution

DP27 provides a fast and smooth live image at the 5.05 megapixel resolution, for quick and effortless panning and focusing. Even when working at Full HD resolution, a comfortably fast live image at 22 frames per second is available. As the non-compressed image is able to reproduce images with absolutely no degradation in quality, operators make simple focusing and framing.

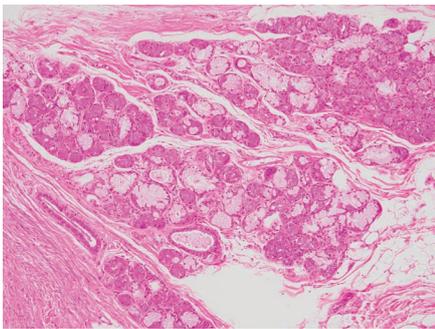

5M Detailed structure can be observed.

2M

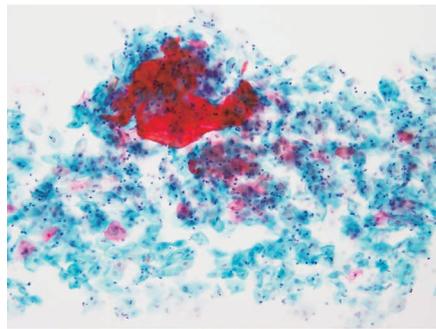

◎ Three Color Modes

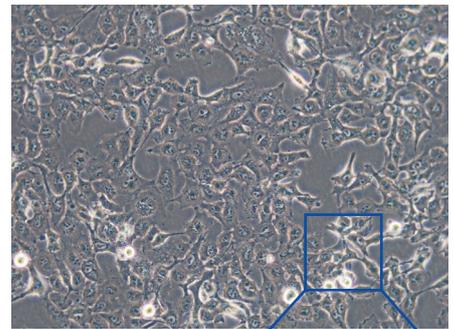

Three color modes are provided, enabling the operator to tailor the image to suit the requirements of different applications. By selecting one of the three preset modes, optimum images can be acquired under various samples and observations without having to change all the settings each time.

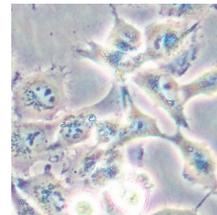

High fidelity mode

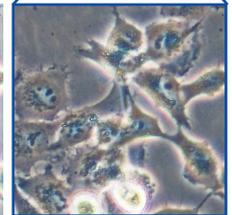

Normal mode

Cell culture mode

Conventional mode

Cell culture mode:
Halation is reduced to allow clear observation of cell shapes.

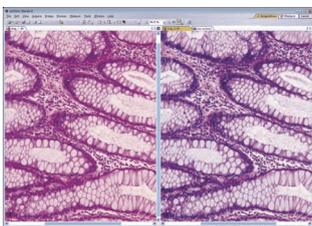

- **High fidelity mode** : Reliable color reproduction equivalent to microscope observation.
- **Normal mode** : Enhanced color facilitates acquisition of even pale stained specimens.
- **Cell culture mode** : Dedicated to phase contrast and DIC observations.

Superior Functionality and Enhanced Scalability Give You More Flexibility and Operational Convenience

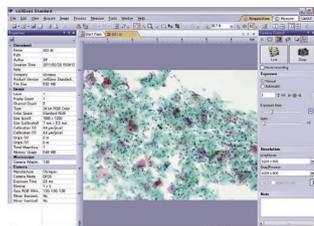

◎ cellSens Imaging Software (Not for Clinical Diagnostic Use.)

Adjust white balance, switch to live display and capture images, all at the touch of a button. cellSens offers an array of image processing capabilities, including a versatile shading function that enables real-time correction for variations in peripheral field illumination intensity. In addition, exposure settings, magnifications, and other parameters are saved with acquired images for easy storage and retrieval.

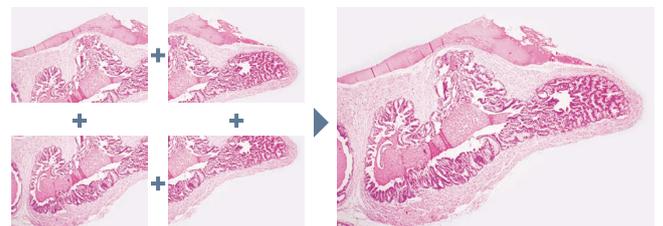

The innovative cellSens software offers a wide array of useful and easy-to-use functions. Split-screen display, for example, provides simultaneous viewing of multiple images, or a live image and the most recently captured image. Pictures taken at adjacent locations can also be stitched together to create a single image using the Multi-Image Array functionality. cellSens software has the capability to store user comments with captured images, which can be referred to as necessary or searched using the cellSens Database.

Split-screen Display

File management

Automatic & Manual Image Stitching

◎ Easy USB 3.0 Connection

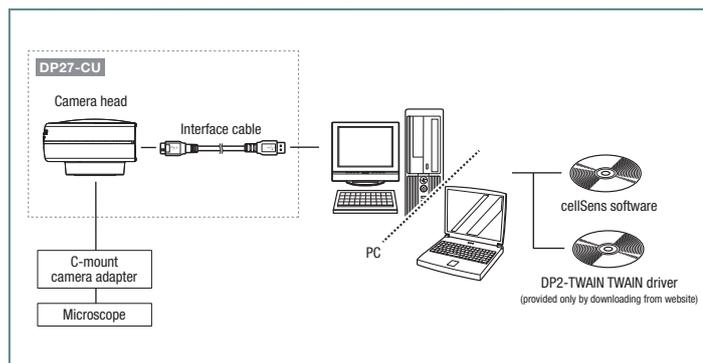

The DP27 is compliant with the USB 3.0 standard for quick connection to compatible computers and fast transfer of image data.

Flexible Design with Stand-Alone Operation Capability

◎ Simple, Space-Saving Stand-Alone Connectivity

While PC-connected operation provides optimal functionality and scalability, the DP27 can also function effectively in a stand-alone configuration, which features simple operation and easy control from mouse, keyboard or touchscreen monitor.

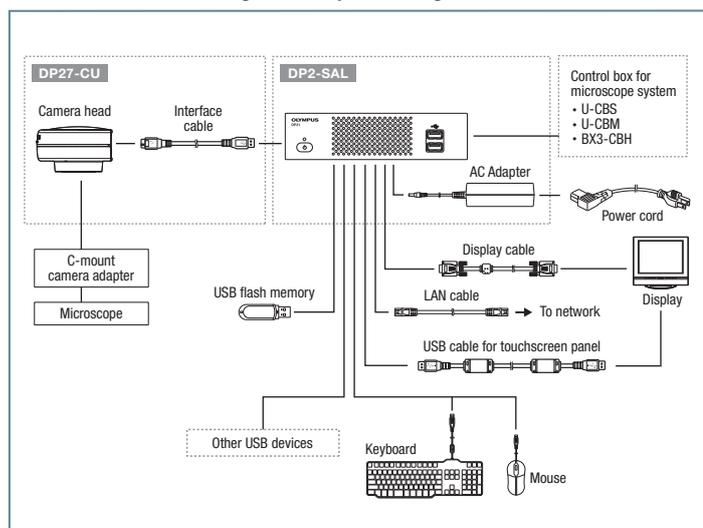

DP27 PC configuration system diagram

DP27 Specification

Type	Single chip color CCD camera	
Imaging sensor	Size	2/3 inch color CCD
	Effective pixels	5.05 megapixels (total: 5.24 megapixels)
	Scanning method	Progressive scanning
	Color filter	RGB primary color on-chip filters
	Recording area	8.4(H) × 6.62(V) mm, diagonal length 10.73 mm
	Maximum recorded pixels	4.7 megapixels (2448 × 1920)
Mount	C-mount	
Sensitivity	Equivalent to ISO 100/200/400	
Metering Area	Full image / 30% / 1%	
Exposure control	Auto/Manual	
	AE lock (enabled when Auto Exposure is selected)	Exposure compensation: Area -2EV to +1EV, +side:1/6EV step, - side:1/3EV step (enables when Auto Exposure is selected.)
Exposure time	Auto: 1/20,000s to 2s	
	Manual: 1/20,000s to 8s	
Camera I/F	USB3.0 Micro-B	
Dimension	Camera Head	77 (W) × 69.5 (D) × 42.5 (H) mm
	Control Unit	180 (W) × 200 (D) × 47 (H) mm

DP27 stand-alone configuration system diagram

	PC connection	Stand-alone
Image size	2448 × 1920	2448 × 1920
	1920 × 1080 (Full HD)	1920 × 1080 (Full HD)
	1224 × 960	1224 × 960
Live image display (frame rate)	15fps (2448 × 1920)	15fps (2448 × 1920)
	22fps (1920 × 1080)	22fps (1920 × 1080)
Compatible image display		1224 × 960
		1224 × 960 (AVI File) ^{*1}
		1920 × 1200 WUXGA
		1920 × 1080 Full HD
		1680 × 1050 WSXGA+
		1600 × 1200 UXGA
		1280 × 1024 SXGA
Storage media		1280 × 960 QVGA
		1280 × 854 WXGA
		1280 × 768 WXGA
		1024 × 768 XGA
		1024 × 600 WSVGA
		800 × 480 WVGA
		USB flash memory, USB-HDD
		Camera I/F: USB 3.0 Type-A
Controller interface	USB 3.0 (+5V / 900mA power output)	Display output: DVI-I (Digital/Analog RGB)
		I/F: USB 2.0 × 4, USB 3.0 × 1
		Wired LAN: 100Base-TX/10Base-T
Scale display	According to cellSens ^{®2} specifications	Serial port: RS-232C D-Sub 9-pin
		Audio: Mic in, Line out
		Scale view & burn in can be selected
Measuring functions	According to cellSens ^{®2} specifications	Available microscope total magnification: 0.01× to 9999.99×
		Up to 28 total magnifications can be memorized

^{*1} With system limitations, skipping of frames may occur in the acquired movie depending on the specimen.

^{*2} cellSens software is not for clinical diagnostic use.
